

OUTDOOR LED SIGNAGE

UTG's Outdoor LED signs are an environmentally-friendly marketing approach to eliminate print and communicate messages more effectively while guaranteeing a return on investment through advertising. At UTG, we custom make our LED signs based on clients' budget and requirements. Ideal for any type of industry, UTG provides any size and resolution, from small signs to large billboards.

Features

- » High Resolution Full Color RGB LED
- » Wide range of pixel pitch options
- » Custom built sizing
- » High brightness and contrast with a built-in light sensor to auto control the sign brightness based on surrounding light (Day/Night)
- » Plays Video, Images and Text
- » Dual Maintenance Modules for easy access (Remove module from the front without opening cabinet for easy repair or replacement)
- » Built-in temperature sensor to measures the outside temperature and humidity. Operational temperature: -50 + 70 °C
- » Wireless/Wired Synchronized/Asynchronized Control System

Content Management Software

- » Advanced group scheduling
- » Split screen in multiple areas
- » Control multiple displays using one control system
- » Real-time editing with abilities to import graphic images and video files: .gif, .bmp, .png, .avi, .mpeg, .mp4, .flv
- » Editable message frames with multiple layers, transition effects and video filled text feature
- » Full control over volume, brightness and contrast
- » Time and temperature feature
